

When the 4 EMA crosses the 20 SMA towards the 80 SMA then alert message and arrow.

Possible buy if below 80 SMA and possible sell if above 80 SMA.

I am using 1 hour and 4 hour time frames but may use on others. Moving averages may change.

If the 4 crosses away from the 80 then no notification is needed.

Red is 80 SMA Blue is 20 SMA Green is 4 EMA
