Forex Money Manager EA

- It works on all MT4 brokers.
- Works on 4 and 5 digits Broker.
- Works in different pairs.
- Switch ON/OFF for each function independently.
- Customizable percent for Scaling Out.

Money management is a critical point that shows difference between winners and losers. It was proved that 95% of traders will lose their money because of their poor money management.

The problem is letting emotions get in the way of rational judgments. When we lose, we feel frustration and sometimes even despair. Winning can cause us to lose control over our actions and turn trading into a gambling, or cause a serious over-trading problem.

As we can not overcome our emotions, the best resolution is to use a mechanical and intelligently automatized money management program, the **Forex Money Manager EA**.

The brilliant **Forex Money Manager EA** can help you in your risk control, and manages your opened positions in a non-emotional way.

You just need to manually open a trade and **Forex Money Manager EA** will do the rest: sets take profit, sets stop loss, moves to breakeven, and shows essential informations on the chart. Furthermore, you can change the price for StopLoss, TakeProfit and Stop & Limit orders, directly from the chart, with moving a visual level line up or down.

Forex Money Manager EA is an amazing tool, simply the best friend of smart and responsible traders.

Introduction

Congratulations on your purchase.

Forex Money Manager EA is the best friend of every trader.

You just need to manually open the trade and **Forex Money Manager EA** will do the rest:

- sets take profit
- sets stop loss
- moves to breakeven
- shows essential informations on the chart
- you can change price for StopLoss, TakeProfit and Stop & Limit orders, directly from the chart

- * Works on 4 and 5 digits Broker.
- * Works in different pairs.
- * Switch ON/OFF for each function independently.
- * Customizable percent for Scaling Out.
- * It works on all MT4 brokers.

It is an amazing help for scalpers and other traders too!

Installation

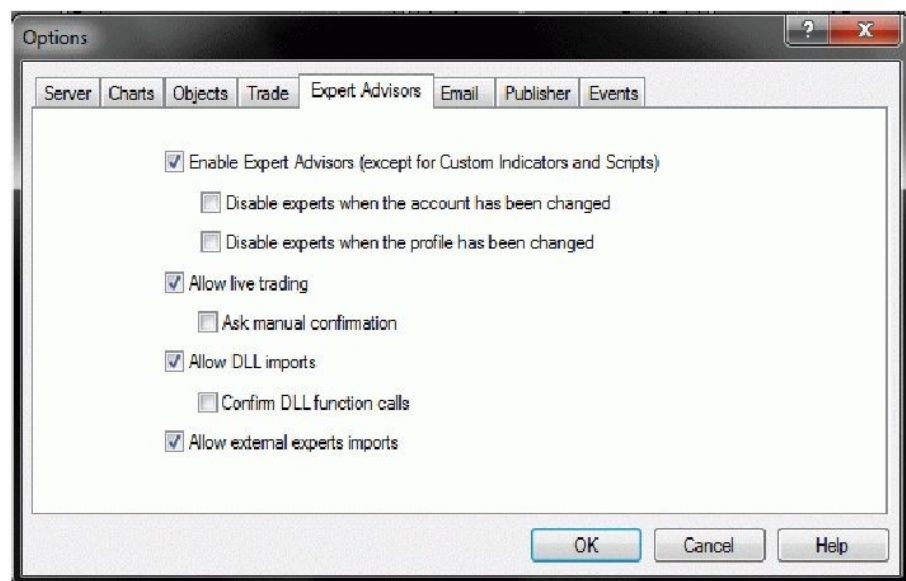

Step 1 – Download and install the Metatrader4 (MT4) platform. You can choose any broker that supports Metatrader4 platform such as Alpari, InterbankFX, FXDD, FXPro etc. Feel free to use your existing brokerage account or choose one by yourself.

Step 2 – Copy the **MoneyManager.ex4** file to your Metatrader experts folder (C:\Program Files\MetaTrader-your broker\experts).

Step 3 – Open your Metatrader4.

Step 4 – Go to Tools>Options.

Click the Expert Advisors Tab and make sure to check marks like in the image below, then click OK.

Step 5 - Enable the Expert Advisors Button.

Step 6 - On the Navigator panel of your Metatrader choose Expert Advisors > Money Manager, and add it to you chart(s).

Now the Money Manager EA should be running.

Step 7 - To set the options of the EA, just push the F7 button.

The Money Manager EA has three separate functions:
Set Breakeven, Trailing Stop and Scaling Out.

Explanation of some main features:

ShowInfo

Set it to false, allows turn all the text off, but it still runs in the background.

AlertSound

Set it to true, emits a sound when First TakeProfit is hit.

AccountIsMicro

Set it to True, develops calculations in Lot Size using 2 digits for First TakeProfit percent. Set it to False, for use 1 digit in Lot Size calculations for First TakeProfit percent.

Account Type

If you account is micro set AccountIsMicro = true.

If you account is mini or standard set AccountIsMicro = false.

Scaling out

First TakeProfit Percent is for "scaling out".

Ie, close to 70% of the position and let the rest go on.

If you open a position of 1 Lot, the EA closes 0.7 Lots and keeps open on market the remaining 0.3 Lots. Ie if you work with 0.04, 70% will be rounded to a 0.03.

Use_TrailingStep

Use this function for "trailing" the stoploss when Start_Trailing_At pips profit is reached. TrailingStep is the amount of pips that will be used to move the Stoploss. If you use 5, the stoploss will move 5 pips for each 5 pips that the price move in profits, after that Start_Trailing_At pips profit is reached.

Set_Breakeven

Use this function for lock profits.

LockPips is the number of pips -with respect to entry point- in which the EA will put the stoploss when Set_BreakevenAt is reached.

Magic Number

Money Manager EA works with trades using magic number = 0. (Manual Trades) This means you can have multiples Trades opened on the same and/or different pairs, set-up the parameters different for the different charts, and place trades with different stops and TP's depending on which chart/TF/pair you have a signal and that the EA's won't interfere with each other or others EA's.

Auto SL & TP

Based on ATR calculations.

Allow_Drag_PriceLines

Using new option Allow_Drag_PriceLines (by default true) you can change price for StopLoss, TakeProfit and Stop & Limit orders, directly from the chart. Just make double click on the line and later "Drag" the line Up or Down to change the price.

Step 8 – Now, you just need to manually open the trade and the EA will do the rest.

ORDERING & DELIVERY

During the checkout process it is possible to choose between: **digital delivery** (instant download link) and **physical delivery** by post on CD (please note, that in this case a small shipping and handling fee may apply).
