

PBF Xtreme Trend Bars User Guide

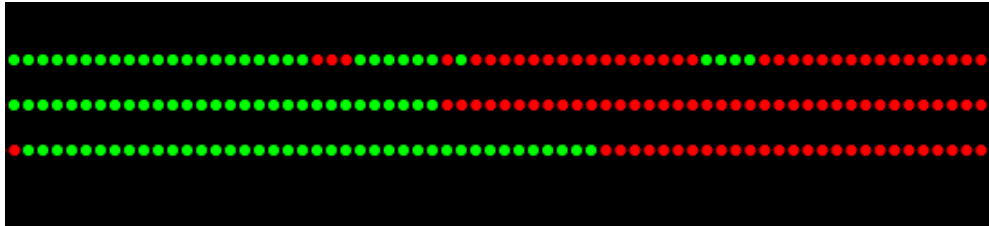

New! MetaTrader 4 Version

Welcome to the PBF Xtreme Trend Bars User Guide

Using the Trend Bars

Everyone knows the trend is our friend, going with the trend is always safer and often more profitable. The Trend Bars allow you to see longer term trends without changing your chart timeframe.

The PBF Xtreme Trend Bars plots three horizontal lines, showing short term, midterm and long term trend. When a trend develops, always take signals from a shorter term indicator in the direction of the longer term trend direction.

Here is a chart with the OSOB indicator plotted as well. When the OBOS stays between the top two Trend Bars, the market is bullish. If it stays between the bottom two Trend Bars, it is bearish.
