Instructions for U-Point EA v2.2

Updated 10.07.2016

Contents

<u>Terms and conditions</u>

The information and services provided on our website is intended for both customers and non-customers.

It is the responsibility of the user of our site to inform themselves about and comply with our terms and conditions before using any information or products contained on our website.

Away From Keyboard Forex will not be held liable for any damage or loss that arises from the use of any services or products we provide. As ever, past performance is no guarantee of future results. Please view our risk disclaimer for further details.

Copyright, Intellectual Property Rights and External Links
Reproduction or distribution is not allowed without prior written permission from ourselves. We may from time to time post links to external website's on our site. Away From Keyboard Forex will not be held liable for the content of external links. We do not have control over the content of these sites and recommend that visitors of these sites take steps to familiarise themselves with the terms and conditions and privacy policies of each site.

Delivery and Refund Policy
All products supplied by Away From Keyboard Forex are shipped electronically. All sales are final.
Please note that for obvious reasons we do not offer refunds for software that is digitally delivered.

All sales are for a single license to use the product on one installation of Metatrader. Your Metatrader account number will need to be supplied at the time of your order, so that your indicator can be licensed to that account.

We cannot be held responsible for the electronic damage of software caused by third party products such as e-mail scanners, antivirus blockers, servers etc. If for any reason it is not possible for you to receive our software digitally, despite our best endeavours, we can alternatively arrange for software to be delivered directly to you on CD via international postal services, at your cost. Please contact us for this request.

Risk Disclaimer

International currency, stock index or commodity prices can be highly volatile and unpredictable. The past is not a guide to future performance and strategies that have worked in the past may not work in the future. No representation is being made that any account will, or is likely to achieve profit or losses similar to those shown.

Prior to trading on the Foreign Exchange market you should carefully consider your investment objectives, level of experience and personal risk appetite. Risks you could be exposed to include, but are not limited to, leverage, creditworthiness, limited regulatory protection and market volatility. Additional risks when using an Internet-based trading system include, but are not limited to, hardware, software and Internet connection failure.

The leveraged nature of foreign exchange trading means that any market movement will have an equally proportional effect on your deposited funds. This may work for you as well as against you. The possibility exists that you could sustain a total loss of your initial margin and be required to deposit additional funds to maintain your position. If you fail to meet any margin requirement, your position may be liquidated and you will be responsible for any resulting losses accrued with your Broker.

The value of any trade, and income derived from it can go down as well as up and your capital is at risk. You should only speculate with money you can afford to lose and be aware that you could lose your initial deposit. The publishers of this site and anyone associated with it, will not be held responsible for any losses incurred as a result of using our systems or any information found on our website. If you are unsure as to whether this form of trading meets your investment objectives then please seek your own Independent Financial Advice.

The application of any techniques, systems or educational information contained on our website or within our materials is done so at the traders own risk and discretion. Away From Keyboard Forex and anyone associated with it will not be held liable for any loss or damage, including without limitation, any loss of profit, which may arise directly or indirectly from use of or reliance on such information. Our website and guides are provided 'as is' and without any warranty.

We have taken every possible measure to ensure the accuracy of the information provided on this website. Any opinions, news, research, analysis, prices, or other information contained on this website are provided as general market commentary, and do not constitute investment advice. Please note that the content on this website is subject to update or change at any time without notice.

All results posted on this website and in associated materials are provided on a 'best endeavours' basis and are not binding. While we endeavour to provide an accurate representation of the performance of our products, due to a variety of factors we cannot guarantee that you will achieve the results posted. Variables include and are not limited to, your ability to act upon the signals, your trading environment and your broker.

Although due care has been taken in preparing this website, the authors and publishers disclaim any liability for any inaccuracies or omissions. Information and materials in this guide and our materials (including our website) may contain information included from, or based on, 'Forward-Looking Statements' within the definition of the Securities Litigation Reform Act of 1995.

Introduction

U-Point EA has been created by Away From Keyboard Forex to find turning points in the forex market.

The U-Point system has many different settings and uses. The 4 hour system shown here is 100% Set & Forget, using our custom built indicator built into the EA. It has strict trade filter system built in, which selects low risk, high probability trades to maximise profit.

The EA will not trade every day. A trade set combines of 6 market orders per pair, with different Stoploss and Take Profit values.

The EA will trade more frequently on lower time frames, but higher times frames are more conservative and are lower risk.
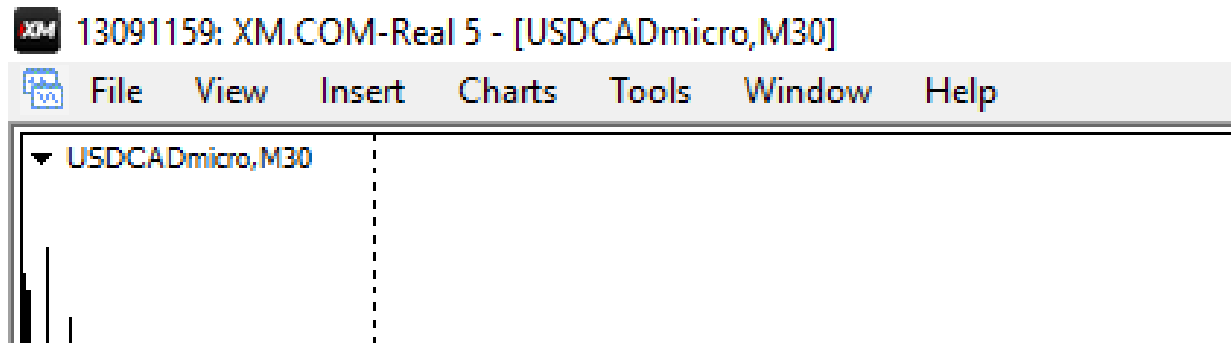

The U-Point EA v2.2 can be used on any currency pair, but we recommend to only trade on currency pairs where the broker spread is 10 pips or less.

The EA has built in money management and trailing stop functions.

.

Installation

After you have purchased the U-Point EA v2.2 System, please send us your metatrader account number which can be found at the top of your platform, i.e 13091159 or go to Tools - Options - Server, to find your number.

We only need your account number, not the broker you use.

We use your metatrader account number to license your Forex Breakout Direction Indicator only to you.

You will need to install the two custom indicators -

Advance ADX.ex4
FX Snipers LSMA.ex4

at the location on your computer -

C:/Program Files/*your broker name*/MQL4/Indicators/

You will need to install the template -

U-Point v2.tpl

at the location on your computer -

C:/Program Files/*your broker name*/Templates/

You will need to install the expert advisor -

U-Point EA v2.2.ex4

at the location on your computer -

C:/Program Files/*your broker name*/Experts/

Then restart your Metatrader platform.

U-Point EA v2.2 Settings

Once you have the indicators, templates and EA installed, choose the currency pair you wish to trade.

We trade on all currency pairs with a spread less than 10 pips

The U-Point EA v2.2 will work on any currency pair and time frame, however the settings printed below are to be used on the **4 hour time frame only**.

If you are going to choose different settings and time frames, please make sure you test your trading system out on a demo account first

Please make sure your EA settings are the same as the below -

Expert - U-Point EA v2.2   ?   ×
