

# 15 MINUTE THV TRIX TRADING METHOD

Key points:

RESPECT PIVOT POINTS!!!!

ENTRIES (After divergence arrows)

Fast Trix ZERO crosses  
Fast/Slow Trix Crosses

ADD ONS

Fast/Slow Trix failed cross  
(Bear/Bull Challenge)

EXITS:

Slow Trix Color Change, or  
Trend Lines, or Major Pivot, or Psych Number

# Trading Plan

- Only risk 2-3% of account per trade
  - Stop Loss = 300% of ATR(20)
  - T/P = 2 X Stop Loss
  - Trail = .75 X Stop Loss
- For Example – S/L = 20 pips, T/P = 40 pips, Trail = 15 pips

A financial chart on a black background. The top part shows candlesticks with green for up and red for down. A blue line (likely a moving average) and a red line (likely a Trix indicator) are overlaid. A yellow circle with the number '3' is placed near a peak in the candlesticks. Below the candlesticks, there's a green line and a red line, possibly representing different indicators. At the bottom, there's a horizontal bar chart with green and red bars. The x-axis has labels for dates: '22 Sep 08:15', '22 Sep 10:15', '22 Sep 12:15', '22 Sep 14:15', and '22 Sep 16:15'.

# Trade 1

- AFTER DIVERGENCE ARROW
- Slow/Fast Trix Cross REJECTION (Sell 1.3404)
- Exit (expect low to become 1.3110)
- Profit (LOOKING FOR 290+ pips)
