

Entry Signal

CSM (Currency Strength Meter) gap value displaying on each cell is the CSM value difference between base and quote currency, which properly indicates pair strength (larger, more bullish; smaller, more bearish)

- **Buy signal of a particular pair will be generated once all the following indicators agree (if pair is selected). (Refer to screenshot3)**
 - CSM1 gap value > CSM1 Limit (if selected)
 - CSM2 gap value > CSM2 Limit (if selected)
 - CSM3 gap value > CSM3 Limit (if selected)
- **Sell signal of a particular pair will be generated once all the following indicators agree (if pair is selected). (Refer to screenshot3)**
 - CSM1 gap value < -CSM1 Limit (if selected)
 - CSM2 gap value < -CSM2 Limit (if selected)
 - CSM3 gap value < -CSM3 Limit (if selected)

Note

Note1: Basket means all active (open) positions opened by this dashboard with the same magic number. The basket profit is the total profit of all these active positions. e.g. Dashboard open 10 positions (not close yet), each order has a profit of \$2. So the total profit is $10 \times \$2 = \20 . If the basket take profit is \$20, then the basket TP will be hit.

Note2: autotrade will open at most 1 position per pair based on signal generated. If signal occurs but position already exists for a particular pair, no order will be sent. However, you can manually click on 'buy' and/or 'sell' button to any number of positions you want (click once send one order).

Note3: Once alert/notification of a particular pair has been sent, the next alert/notification of that pair will be sent after 5 minutes upon signal. The alert and notification are implemented in this way to make sure you receive them once during a certain period instead of numerous alerts/notification coming to you continuously.
