

## Entry Signal

- Buy signal of a particular pair will be generated once all selected candle(s) of that pair are in green (if pair is selected). (Refer to screenshot3)
  - Background color of that pair button is repainted to be green. (Refer to screenshot2)
  - If Autotrade is on, buy order of that pair will be sent (if reverse mode is false), or sell order of that pair will be sent (if reverse mode is true).
- Sell signal of a particular pair will be generated once all selected candle(s) of that pair are in red (if pair is selected).
  - Background color of that pair button is repainted to be red.
  - If Autotrade is on, sell order of that pair will be sent (if reverse mode is false), or buy order of that pair will be sent (if reverse mode is true).

## **Note**

Note1: Basket means all active (open) positions opened by this dashboard with the same magic number. The basket profit is the total profit of all these active positions. e.g. Dashboard open 10 positions (not close yet), each order has a profit of \$2. So the total profit is  $10 * \$2 = \$20$ . If the basket take profit is \$20, then the basket TP will be hit.

Note2: autotrade will open at most 1 position per pair based on signal generated. If signal occurs but position already exists for a particular pair, no order will be sent. However, you can manually click on 'buy' and/or 'sell' button to any number of positions you want (click once send one order).
