

---

There is Demo version of this panel Dashboard Super MA RSI CCI Demo in my product list, pls try it out to get familiar with all functionalities free.

Price is likely to pullback or breakout at important support and/or resistance. This dashboard is designed to help you monitor these critical support and resistance area. Once price moves close to these important support and resistance within the warning area (warning area range is adjustable), alert or notification would be sent out, and indicator panel will be repainted to be red to make it noticeable. So you are free from watching and monitoring chart all day long.

**Dashboard Super Critical Support and Resistance** is an intuitive, and handy graphic tool to help you to:

- Have the most commonly used critical support and resistance (pivot support1/2/3, pivot resistance1/2/3, daily/weekly/monthly pivot, daily open, 100 round point, and previous daily high/low) of 28 major pairs under control with one dashboard.

#### **Features:**

- Ability to select usage of alert/notification function.
- Adjustable warning range for each type of critical support/resistance.
- Ability to select which critical support/resistance to use, by default, all of them are selected.
- Adjustable indicator panel position

Make sure completing the following action items to make this dashboard working.

#### **Important Action Items before Using Dashboard**

1. Download historical data of all 28 pairs. Use this free tool to download historical data by simple one-drag, [LINK](#).
2. Make sure you have all 28 symbols in Symbol window.
3. To make your dashboard looks clear and neat, it's better to apply the black template. Please refer to screenshot3.

#### **Input Parameters:**
