## Introduction

I welcome all the traders worldwide who have finally managed to get their copy of the Illegal traders. I know reading comes with the cost of time and time is money but it's worth investing it right I believe. Let me try by means to make this book short as my intention is to give off the market secrets in a limited time. Note, it's free will to decide to read or not read this book but I will only write about necessary information when it comes to the financial markets. Read with patience and allow your consciousness to help you have a banning desire to make it in the market too.

## **Rationales for publicity of FXLucy**

I know the struggle and hate it with all my heart. Life is better without the struggle and money is one of the many cause of the struggle liking it or not. When I designed the FXLucy the vision was to blast poverty. I really wanted to blast it whenever but I figured out it was not worth blasting it alone. I knew what my fellow traders in the country were going throw because of experience and it was not what I wanted to observe with others. I needed a system that will shock those who had took everything we have. They want your money and they do not mind how little of funds you have. They have told us the exact opposite of what they should have had in the market.

I need and so want to retrieve the losses of the black child. The idea is for the minority to be the majority. If I can really make it possible for the black child then my losses will be worth having. I believe that it's possible to make it with the forex markets. The forex market has made more millionaires than education ever had. The locks to success have changed. This theory applies in real life too, we are against machines, those with high requirements and it's our chance to introduce the foreign system. Jobs are not there and we have to make one. I know opportunities and it's not my habit to lose one. With a true bonding and powerful desire to make money trading it's possible. Let's break poverty lets grind. Grinding is to make something powdered and I want to grind poverty too.

The empathy to the losses of the nation makes me want to help more to our civilians; it's not worth having knowledge and not sharing. The ones who made it have to get back and search for survivors I believe. I am making this FXLucy EA public because the retail investor had waited so long to grab this lifetime opportunity. We are not looking for those who can trade but we are looking for those who can make money trading.

# THE FX LUCY BREAKOUT EA

## Illicit Breakout

*Get the  
FXLucy EA*

FX Lucy is a news trading forex robot to help capture the momentum of high volatility during the news release in the market. Have an opportunity to capture the market spikes each time with light speed and easy access to close with profits during market news release.

All FX Lucy results are document in our social media including Youtube, instagram and Facebook.

## **Kaympey ElderOfMagement background**

We all have some things we should fall in love with. From my childhood I was always in deep love with money. The love of money was enhanced by my parents in teaching me to save every penny I earned. I grew up saving lots of cents and rands in a sealed container. That habit really made me a fortune. I learned the art of money management at 9 and my net worth was always one of the highest among my friends. I really admit the past implants from my parents that made me a man I am.

At my young age I was the quite one who was seen as the most silent and imperturbable. I remained humble and respected those who deserved it. I learned early in life that respect is the first thing that should come first. I obeyed respect and made sure that I also remain in the rightest side.

I never had much struggles financially, as I appreciated what I had and made sure I still survive even in family financial crisis. I was shortly not dependent in my own way that made me a member of the survivor. I never was a big money waster during my childhood. I liked money as much as I disliked losing it unnecessary. I was a shock among the crowd, but I was still like the other kids. One thing that I was different about was that I liked so much money than the others. In the childhood we were mostly told that money is the root of all evil, but it's not. Money is the root of all goodness and the mindset is essential. To have money we must be in great connection with it by loving it.

I always liked money and I believe those who want it should be liking it too. We can't have abundance of what we do not like. I always dreamed big and terminated the fear of money. I was told to like money and so I did chased after it from my childhood. In order to understand what we want and have it we must first try to gain love for it. I would like to give off motivation to anyone who is joining the illicit breakout to have a great affection of money. I myself am not the only one who have the great bonding to money. But looking around to the greatest, they themselves have great affection to money. We must respect and also love money. I learned that it's possible to have money at a young age and we should have a total blackout that it's possible to make any kind of money you want to make.

My teen years were full of independence and I learned to trust myself at an early age. At most times I figured out that the only way to make things possible is to create living ideas in the mind. My idea of having financial freedom was first given life in my mind. Our minds have very powerful influence to the way we act. If we can empower our minds to seek abundance then the universe should respond and will definitely respond. I embraced a positive mindset from the childhood and I believe it's possible. If one can create a powerful believe system then that believe empowered can turn into daily habits.

I really will admire if the people reading this book can have a powerful inspiration and a strong believe to have big in the near future. To have the bright future we should first have bright desire

and perspective on desires. I will like to call everyone to awaken the beast of desire and positive setback. It's possible to waken the right future and make things possible for our desires.

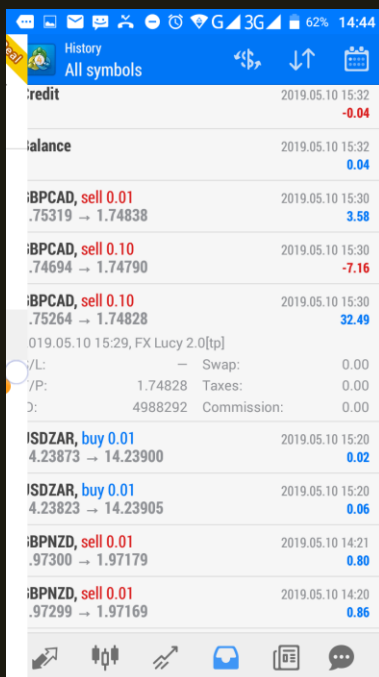

## The FXLucy Results

I want to give you from scratch how the FXLucy trading robot came about and how you can use it to your own advantage. At first I was with no ability to beat the market makers at their own game. I figured out that I was against the professional traders , hedge fund managers , trading robots or algorithm to name a few, and it was with no doubt I was going to lose. And I did lose trying to fight the battle against the undisputed. My only way of survival was trying to trade the exact way they do, or introducing a different way they will never understand. But how will I know the exact way they were trading the financial markets? I had to introduce a foreign system to the trading field and I did. I had to use the same tools they used against us retail traders to be against them. One thing that I still have or have no answer to is what will happen when the minority becomes the majority. The winners in the forex markets are the 5% minority, but one thing that can threaten is when the number increases and the winners are more than the losers. It's one of the reasons I sometimes say the FX Lucy EA is as powerful as much as it's dangerous.

We have had many failures with the FX Lucy EA until we reached the stable version 2.0. The Newbob grew and have finally designed a trading algorithm that has so much accuracy that even the brokers are having trouble with stopping it. At some point systems of this nature easily get banned but it's a life time opportunity to abuse the chance before it vanishes. We once had the great payapa, one minute strategy and modification until they were much more

abused until the market maker and the broker finally figured out a way to corrupt them. If they can't beat your strategy then they will prohibit it. The brokers are not dumb and they will try their best to prevent financial threat to their environment.

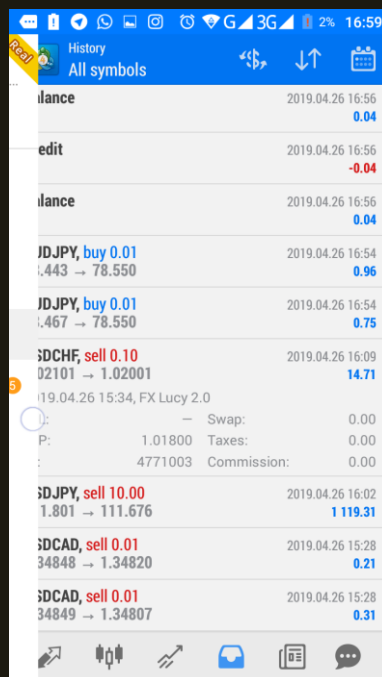

This EA came straight from the struggle of loss and I had to introduce a foreign system. The Newbob grew did their best and finally something came out of the practice. Many people do not believe in automated trading and I even didn't at first until I had to request the design of one to work for me and finally automate the ideas in the real markets. Trading algorithms are just ideas and just like any idea, if it's off harm to the market then they will figure a way to stop it. We want to trade the way they do or either find a way to introduce something they don't know, not what they want us to do.

## Using the FX Lucy EA

TheFX Lucy is an easy to use program and no special training is required. Using FXLucy robot is as easy as knowing how to operate a personal computer. I believe anyone who had used a computer before can work on FXLucy. It is very essential to focus and master using FXLucy before intending to make huge money with it. I will always recommend trying FXLucy on a demo for several times before using on a real account, especially if not familiar with using automated trading.

In order to use the FXLucy program some obvious requirements are needed. The FXLucy user should be having an mt4 platform installed and ready to trade the forex markets. The mt4 platform must have a healthy working internet connection that will not compromise during heavy movements. It's essential to have a fast working computer that's not affected by harmful malware from the internet.

The FXLucy program has no harm if used accurately and can be used from accounts as little as \$10. FXLucy profitability can be increased by obeying all the essential rules that are offered in the FXLucy package. The forward test from the Newbob grew for FXLucy returned a 90% success rate when lunched with optimum caution. In association the capability is unlimited and can be roughly predicted by the risk size and account balance. Huge risk and account sizes will increase the rate of profitability in trading the fundamentals. TheFX Lucy opportunities are unlimited as every

week day is money making day. The opportunities to trade the forex news are at maximum more than 5 times a week and minimum of 2 times. At some optimum day's breakouts can occur more than once a day and help in boosting the profits. The FXLucy EA is only used on the News release and can either be assisted by the trader or left to run by its own.

The FXLucy instructions are as simple as written in the Instruction text. FXLucy robot must be launched before the fundamental news release and allowed in auto trading 1 minute before the news release. This robot is programmed to follow the spike direction and place an order in the direction of the market breakout. It's always best to follow the recommended ways to stay successful trading FXLucy.
