## Pips pocketed per month

Verify for yourself: Click [here](#) and select "Custom Analysis" > Magic > Maori Vibes

## Real Account (RA) vs Backtests (BT)

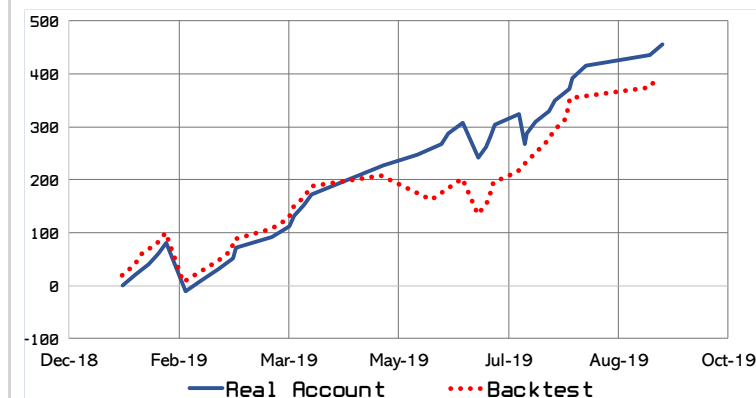

### KPIs: Real Account vs Backtest

	Real Acc since Jan19	10Y Backtest (99.9%)
<b>Profit Factor (constant size)*</b>	1.88	1.55
<b>Profit Factor (real size)**</b>	1.49	1.55
<b>Win %</b>	89%	90%

\* - If position sizes at Real Account had been constant all the time, exactly like in the Backtest.

\*\* - For transparency sake, the Profit Factor as traded in the real account, is also shown. In our real money portfolios, position sizes may vary along time due to portfolio management decisions.

## Pip Equity curves RA vs BT (since RA's inception) – RA behaved better than BT

**Risk Warning:** Past performance is not indicative of future results. representation is being made that any account will or is likely to achieve profits or losses similar to those shown. Foreign exchange trading carries a high level of risk that may not be suitable for all investors. Leverage creates additional risk and loss exposure. Before you decide to trade foreign exchange, carefully consider your investment objective, risk tolerance trading experience and knowledge level. You could lose some or all of your initial investment. Do not invest money that you cannot afford to lose. Odysseia Capital placed all efforts in avoiding errors, omissions or malfunctions both in this document and in the Expert Advisor itself, however this doesn't exempt the product's user from performing all due diligence, testing and investigation considered to be necessary and sufficient by the user to reduce the risks resulting from such eventual mishaps to a level in accordance to the user's own risk tolerance. The present document is not a solicitation for trading. For full disclaimer, please read the last section of installation manual supplied with the Expert Advisor.
