Watch at least five of the videos to get an understanding of the Redknight Powerzone Levels

This is an honest testimonial from a recent purchaser (22-01-21)

Who was sceptical at first about the Powerzone levels.

Hi Fred,

I just wanted to drop you an email to say a massive thank you for the levels and for your amazing contribution to the trading community. I was very sceptical at first but they are proving to be an indispensable part of my trading now. It took a while to get used to having them on the charts and to figure out which ones were the best to use to complement the system I had already built, but now I've got the hang of them I can honestly say that they are a work of genius. I don't get the sorcery behind them, and one day I'd love to buy you a beer and have you tell me all about it, but for now I'll just accept the fact that, like you say, "they work".

I hope you haven't been affected by the adverse weather, and you're keeping safe and well, we need people like you to have our backs in this business.

All the best,

Seb
