

We have implemented a Civil Liability insurance program for a limit of 2,500,000 EUR, which includes market-leading coverage against omissions, fraud, errors, negligence, and other risks that may lead to financial losses of clients.

RoboForex Ltd, which is an "A" category member of the Financial Commission, also is a participant of its Compensation Fund. The Compensation Fund is a service included with Financial Commission membership which provides protection up to €20,000 per case should a Member refuse to adhere to a judgment from the Financial Commission.

The purpose of the Fund is to provide insurance coverage for the traders, who work with the participants of the Financial Commission, and pay them compensations. These payouts are available to any client of the company, which is a member of the Financial Commission, in case the brokerage company refuses or has no chance of abiding the Commission's decision in favor of the client. The sum specified by the Commission may be up to 20,000 EUR per each trader.
