

A promotional graphic for RoboForex. The top half features the RoboForex logo (a stylized 'R' with a robot head) and the text 'RoboForex' in a bold, sans-serif font. Below this, a large pile of blue gift boxes is shown, with several gold coins and two banknotes (one labeled '\$10' and one labeled 'K') floating above them. The bottom half of the image has a solid blue background with white text that reads: '1,300,000 USD to partners', 'Join our 2024 grand promotion!', and a white rounded rectangle containing the text 'Take part' in bold black font.

NonLagMA - indicator for MetaTrader 5

Weighted Moving Average with a minimal lag using a damping cosine wave as the line of weight coefficients.

The indicator has two filters. They are static (in points) and dynamic (expressed as a decimal). They allow cutting the price noise giving a stepped shape to the Moving Average. Moreover, there is the possibility to highlight the trend direction by color.

Also a built-in algorithm of drawing the indicator for the high timeframes is used.

The buy and sell signal are when the indicator changes color in closing bar?

thank you

thomas | 30 Jan 2022 at 20:26

After installing the new MT5 update from today, this indicator does not work any longer.

Mr Durkin please help us and build a new version !!

Kind regards, Thomas.
