

# STOP HUNT TRADING CHEAT SHEET

## 1. Setup Conditions

- Mark equal highs/lows
- Identify support & resistance
- Look for previous swing highs/lows

## 2. Wait for Liquidity Grab

- Price breaks above highs or below lows
- Sharp spike or long wick forms
- Fast, impulsive movement

## 3. Confirm Fake Breakout

- Price returns inside the level
- Strong rejection candle appears
- Breakout fails quickly

## 4. Entry Rules

- Sell after stop hunt above highs
- Buy after stop hunt below lows
- Enter only after confirmation

## 5. Stop Loss

- Place above wick (sell)
- Place below wick (buy)
- Never move stop loss

## 6. Take Profit

- TP1: nearest high/low (partial close)
- TP2: next liquidity zone
- Minimum RR = 1:2

## 7. Risk Management

- Risk 1% per trade (max 2%)

- Max 2–3 trades per day
- Stop after 3% daily loss

## **8. Trading Times**

- Trade London & New York sessions only
- Avoid low volatility markets

## **9. Golden Rule**

- No liquidity grab = No trade
- Trade the reversal, not the breakout
