REASONING BEHIND ENTRY

GBPCHF broke a TL on daily, entered on demo on the break of DBLHC which is doing great, yesterday it retraced and move back up – now it has made an entry signal according to ICWR, and broke TBH, and it has long way to go.

FEELINGS/THOUGHTS DURING THE TRADE

A 4h Pb formed – and broke down, didnt close the trade because the system tells you not to – i didnt go short either, because it is counter trend eventhough it is a superb PB – probably would have if i wasnt long, on the other hand there is an option for BASE365 entry if it goes down to the LONG side, so levaing it like that.

–That decision was great, it did really bounce off a TL and the E.
