

Introduction

Hi all and welcome to my trading system...err, that kinda sounds too formal and boring but...anyway you know why you are reading this so no need to bother you with semantics.

My name is **Olu** (keeping it simple right?) and I am here to sell you my trading system (simply said wasn't it!?). I have been trading forex for the past 5 years and have blown two accounts but after ingesting so much junk and food over those years I was finally able to come up with my own system which I nicknamed **The Daily Mint System**. This system has been extremely profitable since I started using it and has proved itself overtime.

I know it sounds catchy but it really is life changing. After fiddling about with a lot of systems and theories I decided to keep it simple (K.I.S.S.) and guess what? The results were tremendous! I wouldn't be telling you all about the system in this document but I would at least give you some characteristics of the system.

1. The system is based solely on a daily time-frame (Duh! I guess you already deduced that from the system nickname init?)
2. I trade only one pair of currency using this system (I am presently trying it out on another pair but so far would stick to what has been proven...over a period of 5-6 years that is!)
3. It has a yearly performance that ranges from **250%** to **6,000%** profit! (performance varies each year but so far that has been the range after testing for the past 5 – 6 years).
4. It is a **very** simple system to learn but requires consistent practice (through observation) to perfect the art of trading with it.
5. The non-negotiable price of this system is **\$999.99** (it would have to be paid in full before services can be rendered).

Well that's all I can say for now about the system however I would like to elaborate on the last point.

Why am I selling this for **\$999.99**? Why not **\$99.99** or **\$9,999.99**?

The answer to the lower price is indeed obvious, only crappy systems sell for such prices. Think about it, if a website offers you a system or EA that can has a profit potential of 1000% yearly for **\$99.99**, either the author is very generous or is selling you sh*t and the latter most times is the case.

Now to the other bit, why am I not selling it to you for **\$9,999.99**? Simple! Because no one would ever buy it! So I had to be reasonable with the price. The system is indeed priceless but I figured out that the only way to get it into the hands of the lucky few would be to make the price realistic.

I have taken this system through the necessary validation processes namely; paper trading, demo trading and live trading on a small account all with similar results. I plan on taking on only **5** members/buyers per year so once I get this number for this year I would **not** be taking any more until the next session. The reason for this limited numbers is because I plan on offering the best service on a personal level.

I understand that there is the possibility of this system leaking out so the more reason why it is on the dear side because I concur that if you can spend that much on a system then you would be careful to keep it safe. I would be communicating with successful participants only via email or skype so you might not be seeing many posts later on this thread.

At the same time I plan on getting a copyright/patent for this system so that I can sue whoever profits from it or gives it out for little or nothing without my permission (Muhahaha!).

I know this could be like a shot in the dark at what seems risky but I want you to understand that there is no other way I could have done this without jeopardising my profits from the system. I really wish I could tell you more about this trading system of mine now but unfortunately it would be detrimental to my pocket and health (lol!).

If you are interested in this system please send an email to ajantala@gmail.com and I surely would be contacting you soon (See Registration.pdf on how to do this properly). If you have any questions (which I would be willing to answer as long as the response does not prematurely divulge the secrets of the trading system) please ask on the thread for this system on FF.

-Olu.
