# Technical Viewpoints

## EUR/USD

I've been avoiding this pair for a while. It has been hard to trade fibs on this with so much uncertainty. I finally have a target for this pair. Also, as you will see, I will be incorporating Weekly and Monthly Pivot Levels more.

My target for this pair is the Fib 38, Monthly Pivot and Weekly S2 confluence zone at roughly 1.42717

Also, there will be an appendix at the end of this report with full-sized charts.

# Technical Viewpoints

## EUR/GBP

I am still targeting my LT fib 61 on my H4 chart. On my H1 chart, PA has broken and retested the channel for about 20 pips.

When reviewing our Pivot chart, you can see that Weekly R1 is a spot confluence of our fib 61 target.

# Technical Viewpoints

## GBP/USD

Our original target held for about a 160 pip bounce which was stopped dead by the Monthly Pivot. Our second target at fib 50 wasn't met due to the Monthly Pivot friction, but our first target more than made up for that.

Our next target is fib 61 at roughly 1.61077. Expect Mild/Medium friction at fib 50 before that as it confluence with Weekly S1.

## USD/CAD

*FX*  *Bookies*  
*Improve Your Odds*

# Technical Viewpoints

## EUR/CAD

Our initial analysis on this pair still remains. However, expect some friction at Weekly S2 at 1.4028 in addition

This pair has a few more high-prob targets to the south. Notice PA has broken LTL and has re-tested.

Moves to the south to first find mild/moderate friction at 1.4

After that, expect mild/moderate friction at fib 38 with moderate friction at PPZ fib 50 and SR 1.38413

Expect very heavy friction at multiple fib PPZ at front 1.37715 back 1.37485

# Technical Viewpoints

## GBP/CAD

This pair is currently being held up at Weekly S1 to the pip right now. Our targets still remain to the south. Looking for Fib 50, “00” 1.58 and Weekly S2 confluence.

# Technical Viewpoints

## GBP/CHF

I finally have a target on a CHF pair. I have been avoiding CHF like the plague for the last few weeks, but now that we have a solid swing to trade on, we might see some targets coming up. This one is an SR, fib and Weekly S2 confluence.

*FX*  *Bookies*  
*Improve Your Odds*

# Technical Viewpoints

## USD/CHF

This is a medium-prob trade to be taken manually as you need to watch PA with this one. This one is strictly based on Pivots. There is a PPZ made from a Monthly R1 and a Weekly R2. This is to the north. Please see pivot chart.

# Technical Viewpoints

## AUD/USD

I have 2 targets for this pair. One is a PPZ to the north of Weekly R3 and Monthly Pivot (High-Prob) and the other is a confluence of fib 38 and Weekly S1 to the south.
